

Atty. Dkt. No. 10007152-1

## II. REMARKS

This amendment corrects two minor defects in the wording of the specification.

In paragraph [00074], the wording is corrected by reversing the position of the numbers "500" and "600" to make it clear that the function 600 (Figures 6, 7, and 8) carries out evaluations at the request of the function 500 (Figure 5), rather than the function 500 carrying out evaluations at the request of the function 600. This conforms the text of the specification to the drawings, since the function 500 is clearly shown in Figure 5 at the step 600 to be executing the function 600 (the details of the function 600 appear in Figures 6, 7, and 8).

In paragraph [00093], "a" has been removed from in front of the phrase "recursive function calls" to correct a simple grammatical error in the first sentence of this paragraph.

Applicants believe that the present application, as amended, is now in condition to be printed as a patent. Entry of this amendment is respectfully requested.

The Commissioner is hereby authorized to charge any additional fees which may be required regarding this application under 37 C.F.R. §§ 1.16-1.17, or credit any overpayment, to Deposit Account No. 08-2025.
